WHY IS OXYGEN SO IMPORTANT?

The Root Cause of Cancer

Dr. Otto Heinrich Warburg
1931 Nobel Prize Winner

"All forms of **cancer** have two basic conditions: **acidosis** and **hypoxia** (lack of oxygen)"

"**Cancerous** tissues are **acidic**, whereas **healthy** tissues are **alkaline**"

"Deprive a cell 35% of its oxygen for 48 hours and it may become cancerous."

All kinds of disease are caused by one reason: The lack of oxygen.

Dr. Hideyo Noguchi – Famous Pathologist

**INCREASES BRAIN FUNCTION**

A good supply of oxygen to the brain increases creativity, concentration and memory.

**PROMOTE NUTRIENT ABSORPTION**

Oxygen is vital in taking nutrients from the food you eat. Increased oxygen = increased nutrient absorption

**HEALTHIER SKIN**

Increased oxygen gives new elasticity to tired skin

**SPEEDIER PHYSICAL RECOVERY**

Oxygen decomposes lactic acid, speeding up recovery rates and increasing endurance

**INCREASES METABOLISM**

Supplemental oxygen to the terminal cells of the human body increases metabolism, great for weight control

**STRONGER IMMUNE SYSTEM**

Oxygen strengthens the immune system and helps fight off bacteria and virus

**HEALTHY PREGNANCY & FETUS**

Pregnant woman require more oxygen and it is vital for a healthy fetus

**HANGOVER CURE**

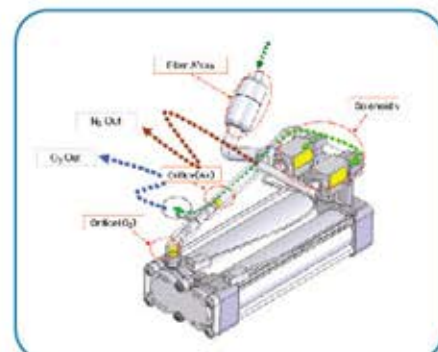

Oxygen decomposes acetaldehyde and is the best hangover cure

VK02 INT

The BEST air purification and sterilization technology plus a built in oxygen concentrator

Will improve all home and work environments and the purchase cost is less than a standard oxygen concentrator on its own.

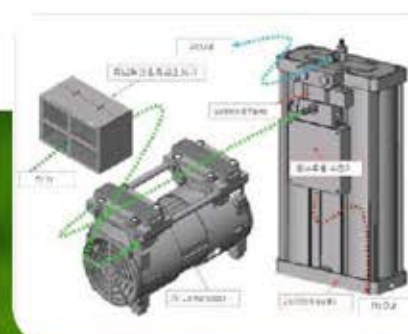

VIRUSKILLER®
VK O² INT

The BEST air purification and sterilization technology plus a powerful external oxygen concentrator

Increases the oxygen levels in the room and is like having 400 trees indoors. The VK02 EXT brings the fresh forest air into the city.

VK02 EXT can be used with or without a headset. The external O2 generator can be stored out of sight and is connected to the VK unit via a small tube.

- 22% is the oxygen level in a forest
 - 20% is the oxygen level in the countryside / urban areas
 - 18% is the oxygen level in built up areas
- Oxygen levels can get as low as 15% in some major cities – this is not a high enough level for healthy human function!*
